---

## Professional Summary

Detail-oriented **Junior Backend Developer** with **1.7+ years** of hands-on experience in building **scalable, secure RESTful APIs** using **Python, FastAPI, and PostgreSQL**. Skilled in **asynchronous programming, microservices, and API security (JWT, OAuth, SQL Injection Prevention)**. Experienced with **Docker, CI/CD (Jenkins)**, and **static code analysis**.

---

## Technical Skills

- **Programming & Frameworks:** Python, FastAPI, SQLAlchemy ORM
  - **Databases:** SQL, PostgreSQL
  - **API Development:** RESTful API Design
  - **Security:** JWT Authentication, OAuth
  - **Tools:** Git, GitHub, SonarQube, Docker
  - **Web Technologies:** HTML, CSS
- 

## Professional Experience

### Junior Backend Developer

*KaryaHub Solutions | Hyderabad, India | Aug 2023 – Present*

- Designed and developed **secure, high-performance RESTful APIs** using **FastAPI, SQLAlchemy ORM, and PostgreSQL**.
- Implemented **microservices architecture** and **Dockerized deployments**, ensuring scalability and modularity.
- **Optimized database queries**, reducing response times by **30%** through **SQLAlchemy ORM enhancements**.
- Secured APIs by implementing **JWT authentication (RS256)**, input validation (**Pydantic**), and **security best practices** to mitigate **SQL injection and XSS vulnerabilities**.

- Conducted **static code analysis** using **SonarQube**, identifying and resolving **critical code quality issues**.
  - **Integrated Jenkins CI/CD pipelines**, automating deployments and improving development efficiency.
  - Worked in **Agile teams**, contributing to daily stand-ups, sprint planning, and peer code reviews.
- 

## Projects

### School Management System

Built a **scalable backend system** supporting **various school operations**, including **User Management, RBAC, Curriculum, Fees, Vendor Management, and Real-time Chat**.

- Developed **asynchronous FastAPI endpoints** ensuring **high-performance, low-latency data retrieval**.
  - **Optimized database queries**, reducing execution times by **30%** through **SQLAlchemy ORM enhancements**.
  - Implemented **secure authentication (JWT RS256)** and **Pydantic for data validation**, mitigating security vulnerabilities.
  - Designed a **microservices architecture** with **Dockerized deployments**, ensuring modularity and scalability.
  - **Conducted static code analysis** using **SonarQube**, identifying and resolving **critical code quality issues**.
- 

### SHOU (HRMS, Payroll & Animation Production Pipeline)

Worked on an **integrated HRMS and Animation Pipeline** for **payroll automation and production tracking**.

- Developed **Payroll APIs** for **salary breakup, tax calculations, payslip generation, and compliance tracking**.
  - Created a **tracking system** for **animation sequences, shots, and production stages**, ensuring seamless monitoring.
  - Implemented a **microservices architecture**, enabling independent service scalability and smooth communication between modules.
  - **Integrated Jenkins CI/CD pipelines**, streamlining deployments and improving development efficiency.
-

## Education

### B.Tech in Electrical & Electronics Engineering

Vasireddy Venkatadri Institute of Technology | Guntur, India | 2018 – 2022

---

## Key Achievements

- ✓ **Reduced API response times by 40%** through optimized database queries and async programming.
  - ✓ **Enhanced security across all projects**, mitigating **SQL Injection, XSS, and CSRF vulnerabilities** using best practices.
  - ✓ **Designed a microservices architecture** for **SHOU and School Management System**, ensuring scalability and maintainability.
-
